Re: U.S. Patent Application : Electric Control For Automobile  
Headlights  
Attorney Docket No. : 10541-595  
Visteon Case No. : V200-0900

Dear Ms. Brown:

We have enclosed a draft of the above-identified U.S. patent application. At your earliest convenience, please review the application carefully, and verify that the application accurately describes the invention and discloses the best mode for carrying out the invention.

We have also enclosed a Declaration and Power of Attorney and two original Assignments to Visteon Global Technologies, Inc. (one will be recorded in the U.S. Patent and Trademark Office and one will be filed at Visteon Global Technologies, Inc.). Please review these formal papers carefully and verify that your name and address is correct.

If you believe any changes should be made to the application or to the formal papers, please inform us. We will make the changes and send a revised version to you. If you approve of the application, please sign and date the formal papers, and send them to us for filing with the U.S. Patent and Trademark Office.

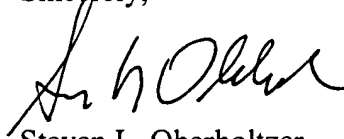

The U.S. Patent and Trademark Office requires disclosure of all information material to the patentability of any existing claim in the application. This information would include, for example, patents, publications, and public use or on sale facts. In the invention disclosure, you provided several patents and, accordingly, we have enclosed a proposed Information Disclosure Statement and USPTO Form 1449 with these patents. If you are aware of any additional material information,

Heather Steiner Brown

Page 2

please advise us, preferably before the three-month deadline after the filing of the application. Since the disclosure requirement continues throughout the entire application process, please advise us if you become aware of any material information in the future.

Sincerely,

A handwritten signature in black ink, appearing to read "S. L. Oberholtzer", written over a horizontal line.

Steven L. Oberholtzer
